

Planning & Environmental Consultants

Planning Phase Project Management

Project Management is a significant part of any wind farm's planning permission application due to the wide and varied project teams involved.

As planning and environmental consultants, McCarthy Keville O'Sullivan are ideally placed to lead and manage wind farm project teams through the planning phase of a project. Obtaining planning permission can significantly increase the value of a site or project, making the management of this phase critical to the overall success of a project.

Our Service

McCarthy Keville O'Sullivan Ltd. can project manage the entire planning application phase of a proposed development. This would include the direction and supervision of all project team members such as wind analysts, geotechnical engineers, etc; communication with a range of stakeholders, such as statutory bodies and Planning Authorities; and adherence to strict deadlines and budgetary constraints. The various stages of the planning application process we can handle include:

- Pre-planning consultation
- Planning Application Preparation
- Requests for Further Information
- Requests for Clarification of Further Information
- Appeals to An Bord Pleanála
- Condition Compliance
